cabolo[®] subtitle

CABOLO Subtitle is designed to save time and money, it records and subtitles in real-time, automatically.

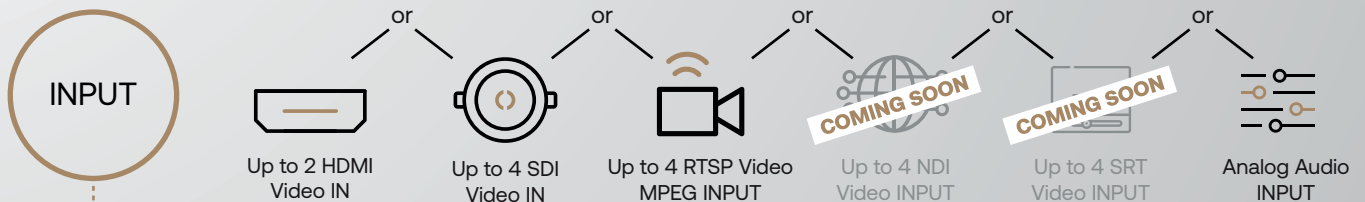

Extensive subtitle customisation with chroma key, multiple language translation, automatic punctuation, and much more.

The automatic transcription technology can handle large volumes of audio and video content, making it a scalable system for subtitling large amounts of content.

It does not require the advanced design of connections and links.

- **More accessibility:** subtitles help to improve comprehension of audio and audio/video content for those who have more difficulty in following spoken language, such as non-native speakers and people with hearing impairments.
- **Multilingual audiences:** subtitles make it possible to reach out to multilingual audiences and make the content accessible to people who speak different languages.
- **Ideal support for:** conferences and events, the education and training sector, broadcasting and live streaming, legal and judicial, and in all those cases where the speech is important to follow.
