

cabolo[®] one

**the ultimate fully offline, multilingual
AI-powered workspace.**

A secure AI boost for day to day business.

cabolo.com

cabolo[®] one

A fully offline workspace for extracting smart notes, insights, summaries, and analysis from any audio, video, or text. Supports more than 40 languages.

CABOLO[®] One is a secure solution that helps teams stay present in conversations while producing clearer, more useful meeting documentation.

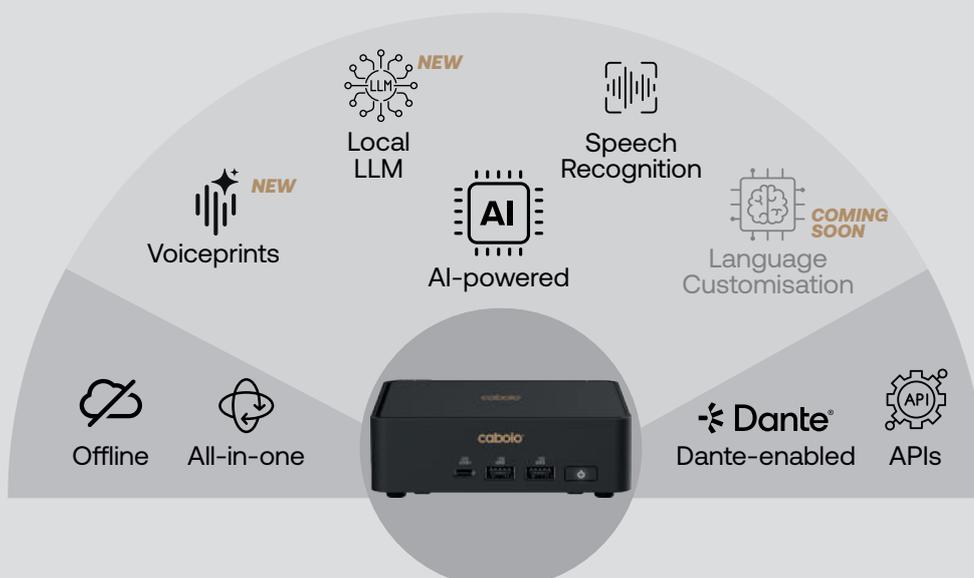

Designed to maximise the benefits of AI while keeping data security paramount. CABOLO operates without relying on cloud processing, keeping your speeches, voiceprints, images, and insights securely in your hands.

CABOLO[®] One helps address the challenges that businesses face in the modern evolution of work:

- **Data Security:** Ensures the privacy and accurate documentation of internal meetings without compromising confidentiality.
- **Efficiency:** Automates note-taking, reporting, summaries, insights, and text editing, freeing up participants' time to focus on key aspects of their work.
- **Ease of Use:** Provides a fully equipped workspace to manage tasks on documents and content in one place.
- **Meeting reports, but better:** Meeting notes that are organised and readable, so outcomes don't get lost after the meeting.

Characteristics of CABOLO[®] One:

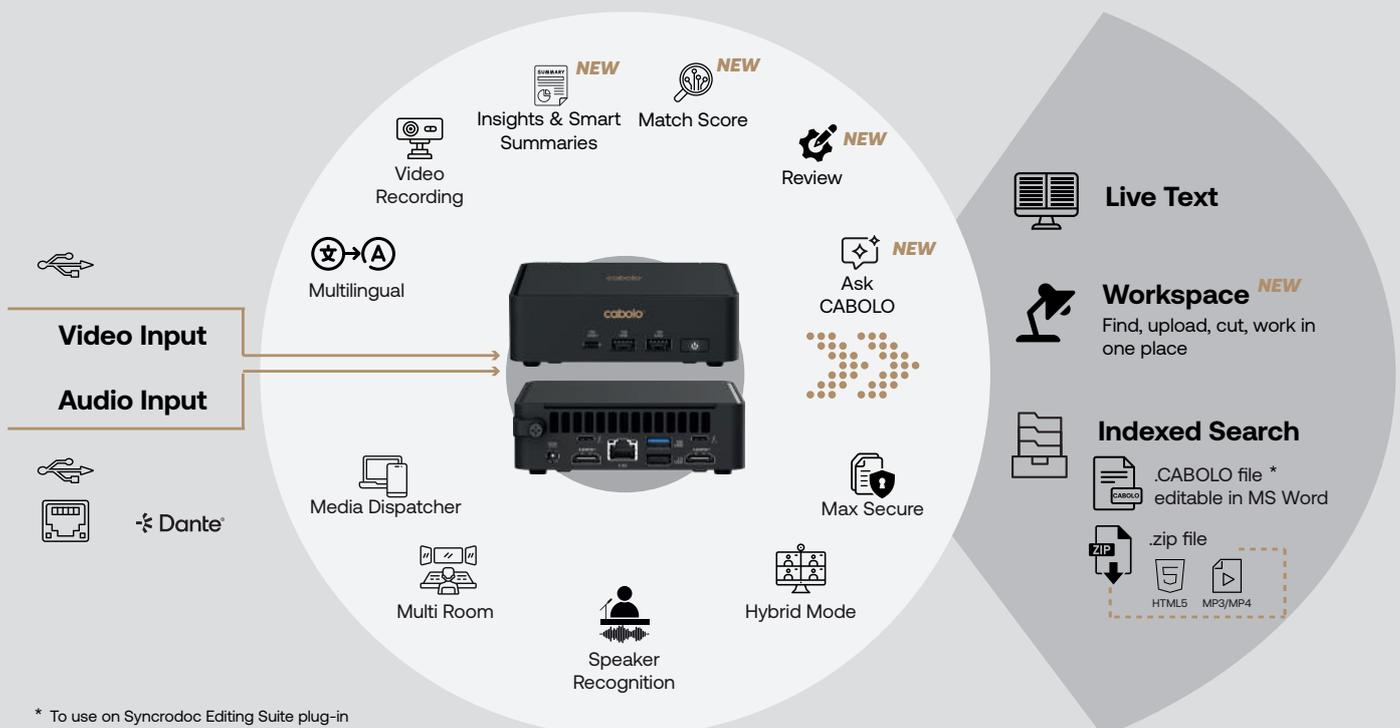

- **Offline:** Operates without any internet connection, ensuring maximum data security.
- **Multilingual:** Leveraging advanced artificial intelligence, provides multilingual support, making the content accessible to a global audience.
- **Speaker Recognition:** From diarisation and voiceprints to separate microphone management, identify "who said what" with full precision.
- **Local LLM:** The offline AI system trained on vast data to support tasks for smart summaries, match score, editing, and insights.
- **Fully brand agnostic,** compatible with professional audio and video systems.

With CABOLO AI **your** speeches, **your** voiceprints, **your** images, **your** insights, secured in **YOUR HANDS!**

Go beyond basic transcription. CABOLO One enriches your reporting activities with:

- **Real-time** audio and video recording.
- **Live notetaking** and text output.
- **Board meeting mode**, producing a draft report with speaker references, annotations, agenda, and voting details.
- **Offline AI** smart summaries, insights, match score, ask CABOLO AI, and automatic text editing.
- **Web based manual text editing** directly on the device.
- **Secure workspace** to upload, find, cut, and edit files in one place.
- **Indexed search** where every word is tagged, enabling fast search, review, and playback across the entire system, filterable by keyword, tag, date, and language.
- **Audio and video file upload** for on device processing, generating text and indexed outputs, supporting both single and multiple file uploads.
- **Outputs:** MP3, MP4, text export in HTML5, and CABOLO files for timestamped synchronised editing.
- **Speaker management** to label on microphones and conference systems using separate audio channels.
- **Hybrid speaker management** via CABOLO Gateway for managing video conference speaker names (MS Teams and Zoom).
- **Max Secure** features including encryption, USB key, file hashes, watermarking, and an electronic certificate (eIDAS and eIDAS2 compliant).
- **Multi Room** to manage different rooms with a single device over Dante, recording each space independently.
- **Media Dispatcher** delivering text, audio-video to personal devices or digital signage on the same network via secure URLs.

* To use on Syncrodoc Editing Suite plug-in

Available Versions

Depending on requirements, set up, and integration needs, CABOLO One is available in four different versions. Each solution is available on a pay as you go hourly basis, starting from 100 hours, as well as an unlimited hours option.

Professional Verbatim Editing Suite **cabolo**® Syncrodoc

CABOLO® Syncrodoc is a cutting-edge, patented plug-in developed to streamline the review process of draft reports produced by CABOLO®, directly within the MS Word environment.

This advanced tool offers synchronised audio, video, and text functionality, enabling quicker and more intuitive text review, all seamlessly integrated into the familiar editing interface for reporting activities.

Key functionalities include:

- **Effortless correction and editing:** Syncrodoc provides an intuitive platform to review and edit reporting text with access to associated audio-visual recordings.
- **Multi-level proofreading:** Syncrodoc supports multiple stages of revision, ensuring rigorous quality control.
- **Automatic audio, video, and text synchronisation:** Syncrodoc maintains perfect synchronisation among audio, video, and text throughout the editing process. This feature streamlines report generation and provides high efficiency.
- **Advanced 'point-and-click' functionality:** Syncrodoc uses timestamps to link each word in the text to its precise position in the audio-visual recording. Users can verify the accuracy of each word with the click and playback navigation.
- **Multi-format file export** of revised files from Syncrodoc as MS Word supported formats, such as DOCX, PDF, XML.

Easy text editing on MS Word

Integrated audio player in MS Word

Multi-format file export

Works with foot pedal & headset

Synchronised audio and text

Time & Cost saving

EXAMPLE USE CASES

CONFIDENTIAL MEETINGS, REPORTED IN REAL-TIME

CABOLO® One is an ideal solution for customers who require real-time processing of meetings and boards of directors sessions to support reporting activities. This efficient, secure, fully offline system is designed to meet the highest standards of confidentiality and productivity. It ensures that every meeting is accurately recorded, documented, indexed, and archived, providing a comprehensive and reliable record.

40 YEARS OF INNOVATION

We provide offline, secure, AI-powered solutions to public and private sector customers, delivering trusted, accurate, and effective digital transformation. Our advanced technologies protect your data and add value to your words.

MEETING NOTETAKING DONE SECURELY AND EFFICIENTLY

Taking notes during meetings or interviews, in person, hybrid, or remotely, can be time consuming. Simply recording the meeting is not enough, as the content must then be processed, often requiring costly external services. Sharing sensitive material with third parties also presents a significant risk to organisational privacy and security. CABOLO® One provides a reliable, portable, multilingual, and fully offline solution that improves efficiency while protecting confidentiality.
