cabolo[®] podium

Multimedia capability, offline AI, and accessibility, all in one solution. An elegant design for a fully inclusive multimedia podium.

Using advanced artificial intelligence, CABOLO[®] Podium provides live subtitling and a presentation mode through its integrated screen, making content accessible to any audience. Supporting over 40 languages, it also provides live insights.

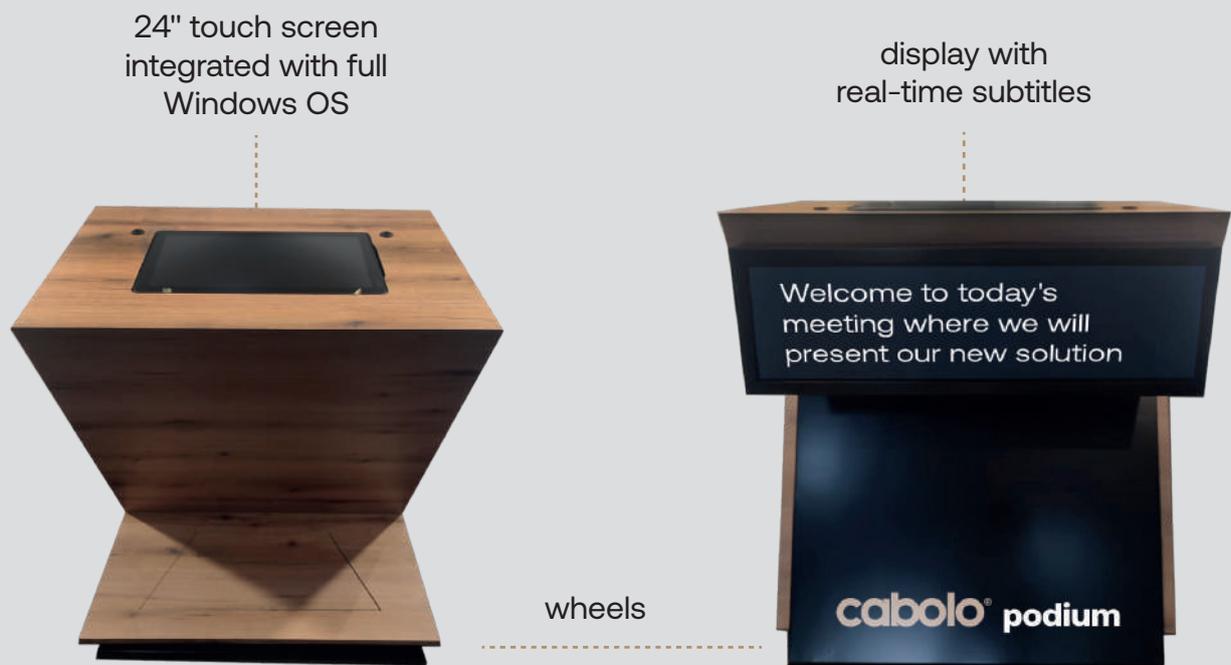

CABOLO[®] Podium is ideal for auditoriums, press rooms, university lecture theatres, and conference venues hosting events where content must be delivered effectively and immediately, supporting full accessibility and participation.

It features an integrated, easy to use, fully self sufficient control system. It can play audio and video content both in room and via streaming platforms.

Its robust, mobile structure allows for straightforward installation without the need for additional equipment or set up.

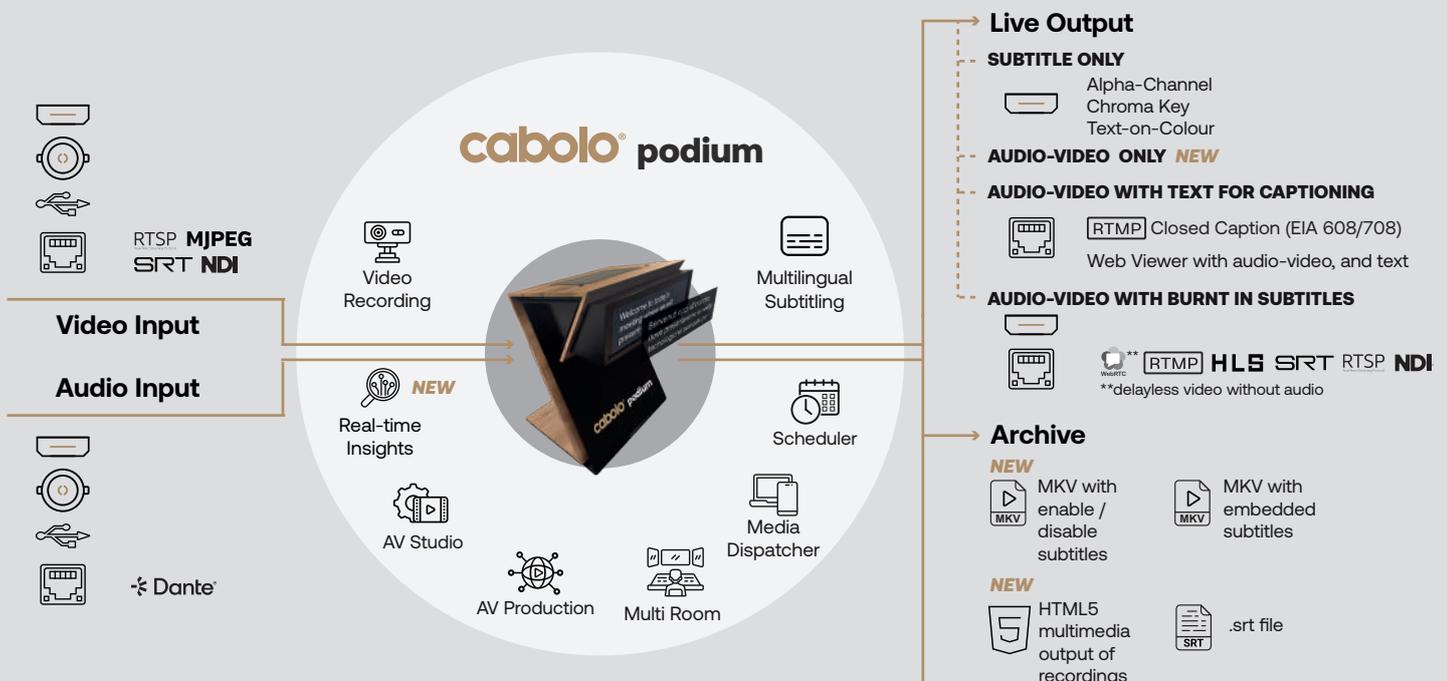

Key characteristics of CABOLO[®] Podium:

- **Enhances accessibility and inclusion:** Subtitles provide a visual aid that helps audiences follow the dialogue, including in different languages. Real time subtitles also enable audiences to follow presentations more easily.
- **Saves time and resources:** Streamlines workflows and reduces production costs.
- **Improves content quality:** Produces professional video output with accurate, synchronised subtitles.

Functionalities

- **Embedded 24 inch Wacom touch display** enables convenient multimedia management of presentation materials, supporting the speaker directly from the podium without the need to connect external devices.
- **37" display** for real-time visualisation in live display subtitle format during the speech.
- **Integrated directional microphones;**
- **Real-time audio-video recording.**
- **Single and multiple audio-video file upload** for batch .srt file production.
- **Real-time multilingual subtitling** one burnt in subtitled video output, and up to 3 HDMI text-on-colour outputs.
- **Multi Room:** To manage different rooms with a single device over Dante, recording each space independently.
- **Media Dispatcher:** to deliver text and audio-video to personal devices or digital signage on the same network via secure URLs.
- **Scheduler:** For pre-scheduling live recording sessions.
- **AV Studio:** PiP, WebRTC live delayless preview, video mixer, seamless multi-viewer with scaler.
- **AV Production:** RTMP streamer, media server, audio-video recording.
- **Local archive:** Includes MKV video files with embedded subtitles, as well as a version with subtitles that can be disabled to provide a standard video recording, alongside SRT subtitle files and HTML5 files.
- **Multimedia text output of recordings:** Saves the recording's text output as a multimedia HTML file, combining audio, video, and text within a fully synchronised and indexed file.
- **Real-time insights (add-on):** Using local, offline AI, provides live insights during the recording to support understanding the conversation easily.

EXAMPLE USE CASES

EFFICIENTLY MANAGING CONFERENCE ROOMS AND LARGE PUBLIC EVENTS

For conference rooms and large public event spaces, CABOLO® Podium offers a simple and effective solution to subtitle speaker presentations, ensuring greater accessibility for all attendees. Intuitive and quick to set up, it eliminates the need for complex planning processes or extensive safety approvals. Event organisers can provide an accessible, high-quality experience without unnecessary complications.

40 YEARS OF INNOVATION

We provide offline, secure, AI-powered solutions to public and private sector customers, delivering trusted, accurate, and effective digital transformation. Our advanced technologies protect your data and add value to your words.

MORE ACCESSIBLE HALLS FOR SCHOOLS AND UNIVERSITIES

For schools and universities requiring accessible classrooms to ensure more inclusive teaching, CABOLO® Podium provides automatic subtitling in the chosen language, providing instant text caption seamlessly integrated into the video feed. Additionally, the availability of subtitles as transcribed text supports the digitisation and distribution of lecture materials.
