

For Immediate Release

CABOLO AND CERTIFIED DISTRIBUTION PARTNER ORION AV AND AUTHORISED DEALER MOJAPELE PRODUCTIONS KICK OFF MAJOR PROJECT WITH MPUMALANGA LEGISLATIVE TO SUPPORT OFFICIAL REPORTING AND HANSARD ACTIVITIES

Rome, 23 February 2026 — CABOLO announces the successful kick-off of a major new project with MPU Legislative, delivered in collaboration with ORION AV, CABOLO's certified distributor partner, and authorised dealer Mojapele Productions in South Africa. The initiative will support MPU Legislative's official reporting and Hansard activities, helping to improve the speed, consistency, and accessibility of parliamentary official records.

The project brings together CABOLO's advanced transcription and workflow capabilities with ORION AV's on-the-ground expertise in professional AV systems integration and operational deployment. The collaboration is designed to strengthen end-to-end reporting processes, from capture and synchronisation through to accurate text output aligned with official reporting requirements.

"We are proud to be working with MPU Legislative on such an important programme," said Enrico Giannotti, Managing Director at CABOLO. "Official reporting and Hansard activities demand reliability, security and high standards of accuracy. This project marks a significant step forward, and we're excited to deliver meaningful operational value from day one."

Quintin Venter, Director at ORION AV added: "As a certified partner, our focus is ensuring a robust deployment that fits real-world legislative environments. We're delighted to be collaborating with CABOLO on this landmark project and look forward to building on this momentum."

CABOLO also welcomed partners at ISE Barcelona in early February to discuss project outcomes, partner enablement and upcoming deployments. Looking ahead, CABOLO and ORION AV plan to develop new projects in South Africa throughout 2026 and beyond, expanding access to modern official reporting workflows and supporting institutions seeking enhanced accessibility and productivity.

About CABOLO AI

CABOLO develops offline, secure AI-powered solutions for professional audio-video processing, helping organisations extract trusted value from speeches, recordings, documents and data, on-premises and at the edge.
