nowhere else.

cabolo.com

cabolo[®] one

A fully offline AI workspace for reporting activities, delivering real time insights, summaries, and analysis from any audio, video, or text, supporting more than 40 languages.

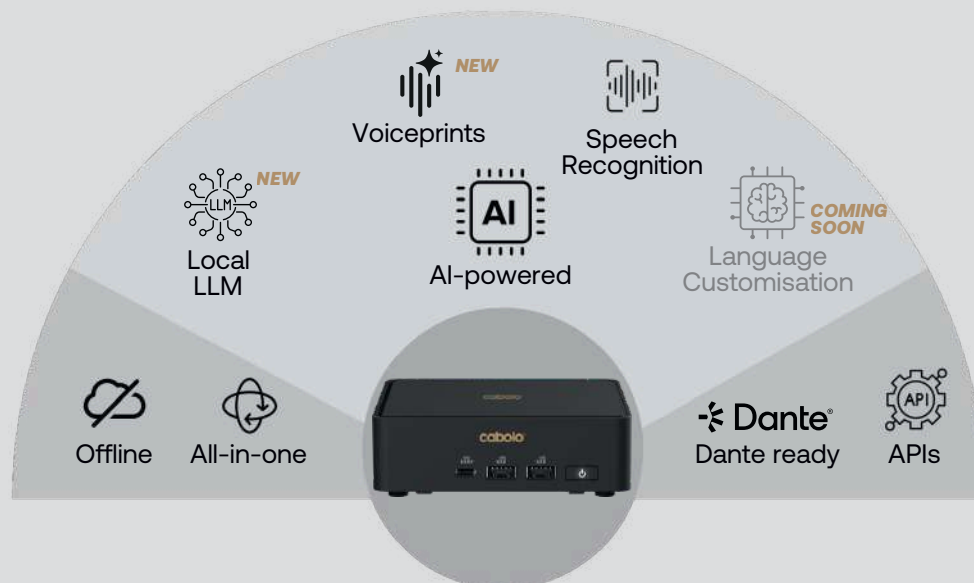

CABOLO One is a secure solution that helps teams stay present in conversations while producing clearer, more useful meeting documentation. Designed to maximise the benefits of AI while keeping data security paramount. CABOLO operates without relying on cloud processing, keeping your speeches, voiceprints, images, and insights securely in your hands.

CABOLO One helps address the challenges that businesses face in the modern evolution of work:

- **Data Security:** Ensures the privacy and accurate documentation of internal meetings without compromising confidentiality.
- **Efficiency:** Automates note-taking, reporting, summaries, real-time insights, and text editing, freeing up participants' time to focus on key aspects of their work.
- **Ease of Use:** Provides a fully equipped workspace to manage tasks on documents and content in one place.
- **Meeting reports, but better:** Meeting notes that are organised and readable, so outcomes don't get lost after the meeting.

Characteristics of CABOLO[®] One:

- **Offline:** Operates without any internet connection, ensuring maximum data security.
- **Multilingual:** Leveraging advanced artificial intelligence, provides multilingual support, making the content accessible to a global audience.
- **Speaker Recognition:** From diarisation and voiceprints to separate microphone management, identify 'who said what' with full precision.
- **Local LLM:** The offline AI system trained on vast data to support tasks for smart summaries, Match Score, editing, and insights.
- **Fully brand agnostic,** compatible with professional audio and video systems.

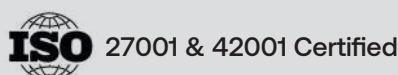

With CABOLO AI **your** speeches, **your** voiceprints, **your** images, **your** insights, secured in **YOUR HANDS!**

Go beyond basic transcription. CABOLO One enriches your reporting activities with:

- Real-time audio and video recording.
- Live note-taking and text output.
- Board meeting mode, producing a draft report with speaker references, annotations, agenda, and voting details.
- Offline AI real-time insights, smart summaries, Match Score, Ask CABOLO AI, and automatic text revision.
- Secure workspace to upload, find, cut, and edit files in one place.
- Indexed search where every word is timestamped, enabling fast search, review, and playback across the entire system, filterable by keyword, tag, date, and language.
- Audio and video file upload for on-device processing, creating text and indexed outputs, supporting both single and multiple file uploads.
- Web-based manual text editing directly on the device (coming soon).
- Speaker management to label on microphones and conference systems using separate audio channels.
- Hybrid speaker management via CABOLO Gateway for managing video conference speaker names (MS Teams and Zoom).
- Max Secure features including encryption, USB key, file hashes, watermarking, and an electronic certificate (eIDAS and eIDAS2 compliant).
- Multi Room to manage different rooms with a single device over Dante, recording each space independently.
- Media Dispatcher delivering text, audio, and video to personal devices or digital signage on the same network via secure URLs.

Professional Verbatim Editing Suite **cabolo**® Syncrodoc

CABOLO® Syncrodoc is a cutting-edge, patented plug-in developed to streamline the review process of draft reports produced by CABOLO®, directly within the MS Word environment.

This advanced tool offers synchronised audio, video, and text functionality, enabling quicker and more intuitive text review, all seamlessly integrated into the familiar editing interface for reporting activities.

Key functionalities:

Effortless correction and editing

Syncrodoc provides an intuitive platform to review and edit reporting text with access to associated audio-visual recordings.

Automatic audio, video, text synchronisation

Syncrodoc maintains perfect synchronisation among audio, video, and text throughout the editing process. This feature streamlines report generation and provides high efficiency.

Multi-level proofreading

Syncrodoc supports multiple stages of revision, ensuring rigorous quality control.

Advanced 'point-and-click' functionality

Syncrodoc uses timestamps to link each word in the text to its precise position in the audio-visual recording.

Users can verify the accuracy of each word with the click and playback navigation.

Multi-format file export

Multi-format file export of revised files from Syncrodoc as MS Word supported formats, such as DOCX, PDF, XML.

Integrated audio player
in MS Word

Easy text editing on MS Word

EXAMPLE USE CASES

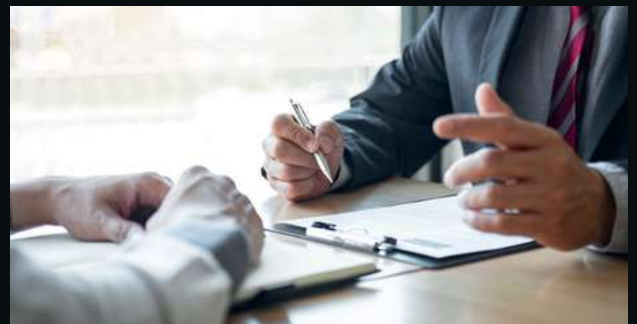

CONFIDENTIAL MEETINGS, REPORTED IN REAL-TIME

CABOLO One is an ideal solution for customers who require real-time processing of meetings and board of directors sessions to support reporting activities. This efficient, secure, fully offline system is designed to meet the highest standards of confidentiality and productivity. It ensures that every meeting is accurately recorded, documented, indexed, and archived, providing a comprehensive and reliable record.

OVER 40 YEARS OF INNOVATION

We provide offline, secure, AI-powered solutions to public and private sector customers, delivering trusted, accurate, and effective digital transformation. Our advanced technologies protect your data and add value to your words.

MEETING NOTETAKING DONE SECURELY AND EFFICIENTLY

Taking notes during meetings or interviews, in person, hybrid, or remotely, can be time-consuming. Simply recording the meeting is not enough, as the content must then be processed, often requiring costly external services. Sharing sensitive material with third parties also presents a significant risk to organisational privacy and security. CABOLO One provides a reliable, portable, multilingual, and fully offline solution that improves efficiency while protecting confidentiality.
