

cabolo[®] subtitle

all-in-one, fully offline, compact, and ready-to-use solution for video production, real-time subtitling, captioning, and insights

cabolo.com

cabolo[®] subtitle

CABOLO Subtitle is a versatile, fully offline and AV ready solution, providing automatic subtitling, and insights. It records and subtitles in real time with video production, delivering accurate, customised, and professional results.

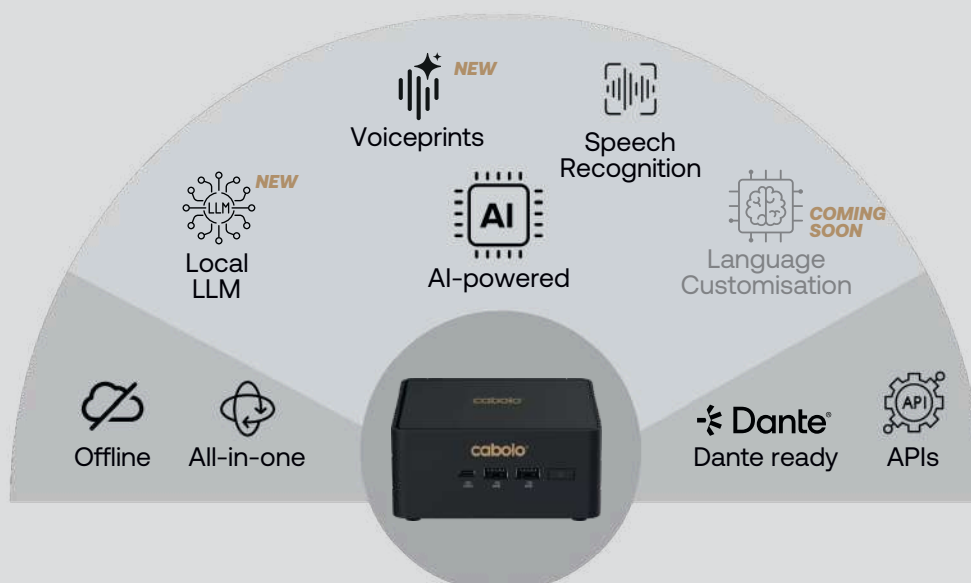

Using advanced AI, CABOLO Subtitle delivers multilingual captioning, making content accessible to a global audience.

CABOLO Subtitle is an ideal solution for conferences and events, education and training, broadcasting and live streaming, legal and judicial environments, and any scenario where subtitle accuracy is critical.

- Enhances accessibility and inclusion: Subtitles provide a visual aid that helps audiences follow the dialogue, including in different languages.
- Saves time and resources: Streamlines workflows and reduces production costs.
- Improves content quality: Produces professional video output with accurate, synchronised subtitles.
- Insights: Get insights of your events and recordings.

Characteristics of CABOLO Subtitle:

- Offline: Operates without internet connection, ensuring maximum data security.
- Extensive compatibility: Fully brand agnostic, compatible with professional audio-video systems, and Dante ready.
- Speaker Recognition: From diarisation and voiceprints to separate microphone management, identify “who said what” with full precision.
- Customisable: Offers configurable features to meet specific requirements and provides APIs for further integration with existing systems.

CABOLO Subtitle is available in two versions, PRO and PREMIUM.

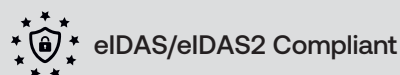

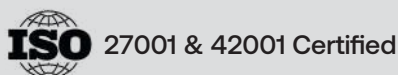

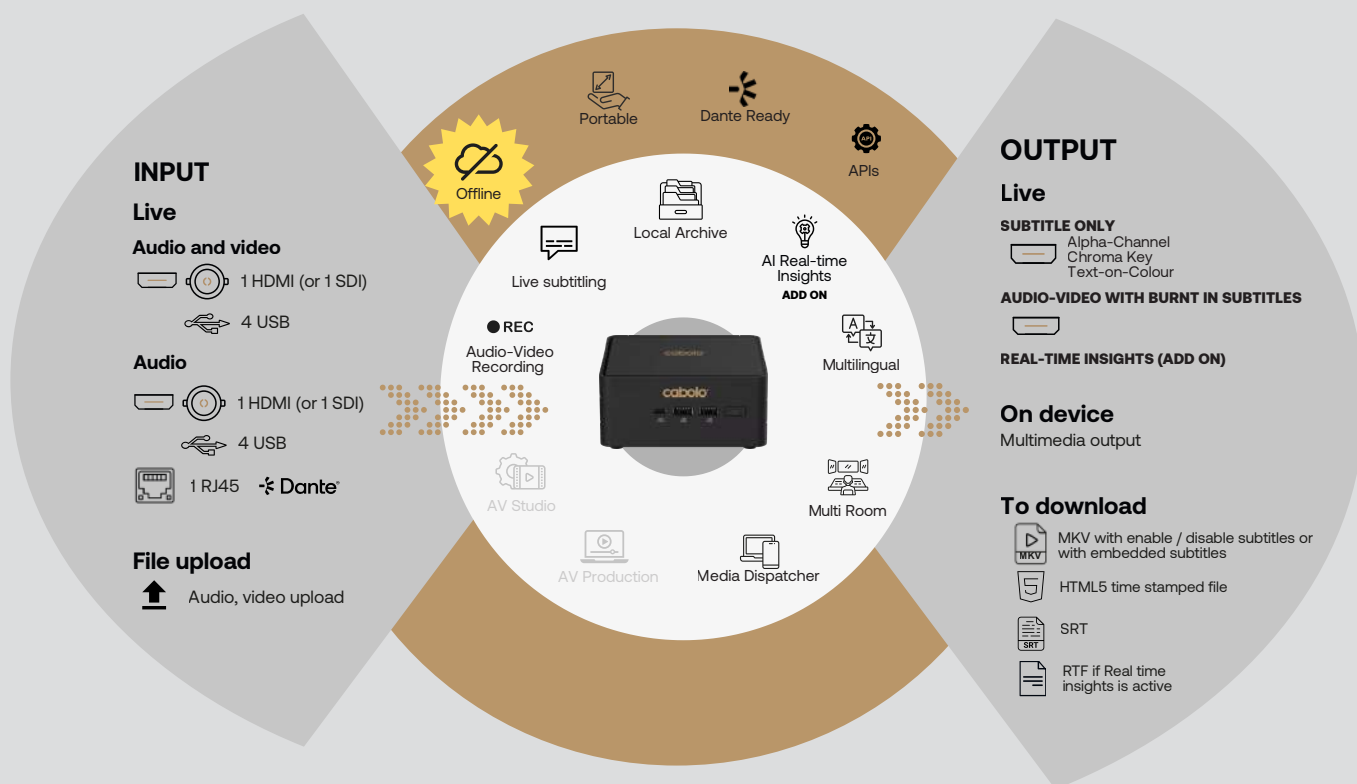

The PRO version is ideal for those who need a quick, intuitive solution with minimal configuration. The PREMIUM version is designed for AV professionals who require advanced tools to manage video content comprehensively and with full customisation option.

The magic box for real-time subtitling, offering ease and efficiency without the need for complex installations.

Functionalities

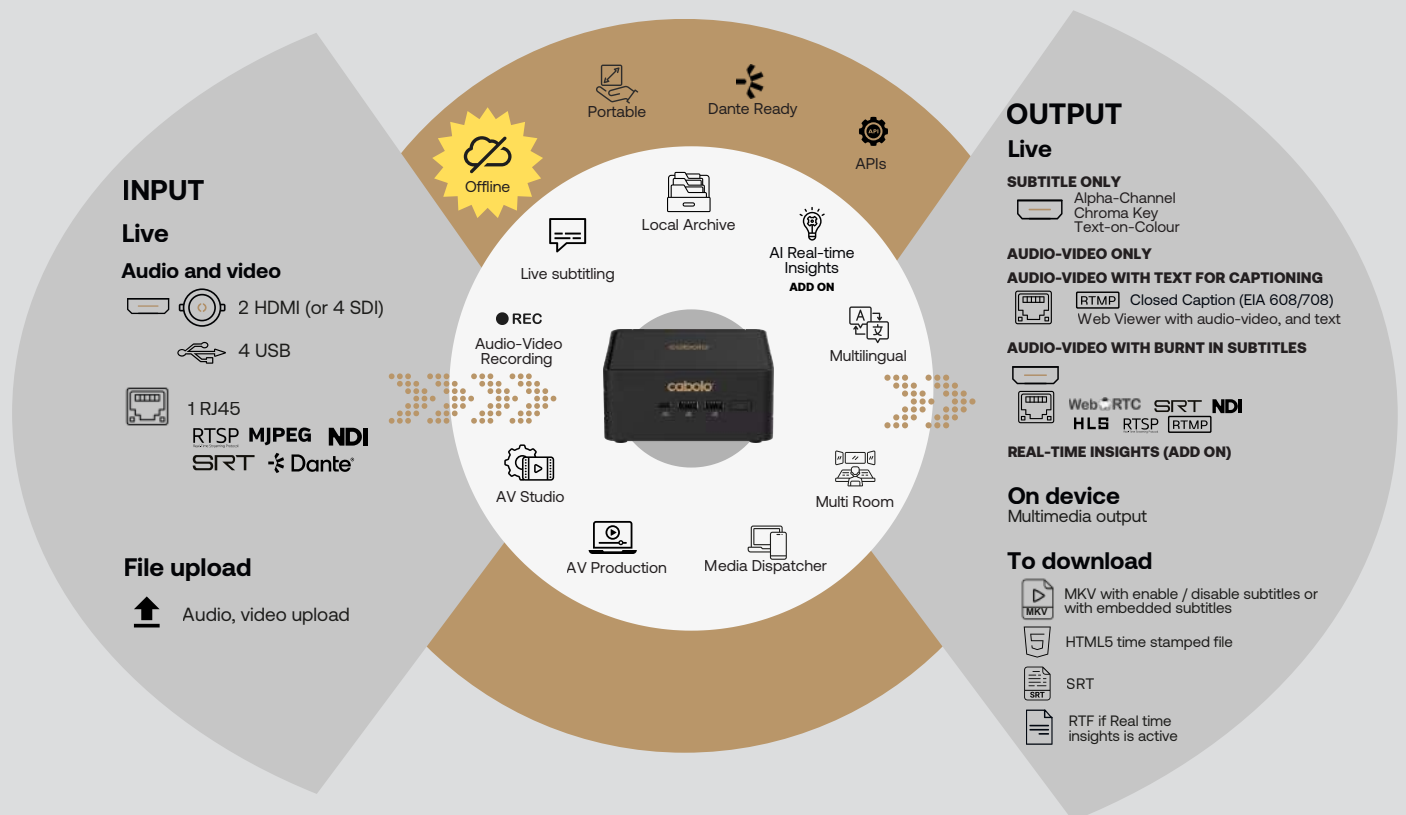

- Real-time audio-video recording
- Real-time multilingual subtitling one burnt in subtitled video output, and one HDMI text-on-colour output.
- Audio-video file upload for batch .srt file production.
- Multi Room: To manage different rooms with a single device over Dante, recording each space independently.
- Media Dispatcher: to deliver text, audio and video to personal devices or digital signage on the same network via secure URLs.
- Scheduler: For pre-scheduling live recording sessions.
- Local archive: Includes MKV video files with embedded subtitles, as well as a version with subtitles that can be disabled to provide a standard video recording, alongside SRT subtitle files and HTML5 files.
- Multimedia text output of recordings: Saves the recording's text output as a multimedia HTML file, combining audio, video, and text within a fully synchronised and indexed file.
- Real-time insights (add-on): Using local, off line AI, provides live insights during the recording to support understanding the conversation easily.

The high-level offline video production, subtitling, and streaming solution with insights.

Functionalities

- Real-time audio-video recording.
- Single and multiple audio-video file upload for batch .srt file production.
- Real-time multilingual subtitling one burnt in subtitled video output, and up to 3 HDMI text-on-colour outputs.
- Multi Room: To manage different rooms with a single device over Dante, recording each space independently.
- Media Dispatcher: to deliver text and audio-video to personal devices or digital signage on the same network via secure URLs.
- Scheduler: For pre-scheduling live recording sessions.
- AV Studio: PiP, WebRTC live delayless preview, video mixer, seamless multi-viewer with scaler.
- AV Production: RTMP streamer, media server, audio-video recording.
- Local archive: Includes MKV video files with embedded subtitles, as well as a version with subtitles that can be disabled to provide a standard video recording, alongside SRT subtitle files and HTML5 files.
- Multimedia text output of recordings: Saves the recording's text output as a multimedia HTML file, combining audio, video, and text within a fully synchronised and indexed file.
- Real-time insights (add-on): Using local offline AI provides live insights during the recording to support understanding the conversation easily.

EXAMPLE USE CASES

PROVIDE A HIGH-LEVEL VIEWING EXPERIENCE

CABOLO Subtitle Premium streamlines the creation of professionally captioned videos. With a single device, you can deliver content across multiple screens, both in room and via streaming, without complex configuration. With its integrated video mixer and scaler, it ensures high quality visuals and customisable subtitles tailored to any event. Communicate effectively with professional subtitling and full AV integration for any audience.

OVER 40 YEARS OF INNOVATION

We provide offline, secure, AI-powered solutions to public and private sector customers, delivering trusted, accurate, and effective digital transformation. Our advanced technologies protect your data and add value to your words.

MORE INCLUSION AND ACCESSIBILITY AT EVENTS

CABOLO Subtitle Pro adds real-time subtitles to meetings and events, supporting inclusion and accessibility. Ideal for settings such as council meetings, government sessions, and universities, it delivers clear, legible live subtitles without the need for external services. A simple way to make information accessible to all.
